From the desk, of

Walter H Raffield

w.raffield@ILSIengineering.com

To whom it my concern:

I am currently the utility inspector for ILSI Engineering, INC with 45 years' experience in the electrical industry with the International Brotherhood of Electrical Workers. I was chosen to inspect the HMGP Retrofit Power Distribution Network Project. Within the scope of work the General Contractor has chosen Kevin Clark Electrical services to perform the High Voltage splicing on the first 3 electrical feeders. It's my pleasure to acknowledge the professionalism of the work that was performed, expecting nothing less from trained qualified workers, the task was organized and worked in a businesslike manner. The Man Holes are excellent and text book perfect.

Thanks for the service.

Walter H Raffield

Inspector
