Re: Kevin Clark Electrical Services, LLC

To whom it may concern:

Louisiana Blending, LLC, is a manufacturing company that produces dry mix specialty cement products for various industries. Our work environment can be challenging due to heat, dust, and the age of a lot of our equipment.

Earlier this year we began using Kevin Clark Electrical Services for electrical repairs and for new installations. We have found them to be responsive, professional, safe, and very good at what they do. They have repaired or replaced motor starters, motors, conduit, and various control components as well as entire control systems for us. They installed, energized, and help to start up a multi-silo level monitoring system that has worked correctly from day one.

Based on my experience, I would highly recommend Kevin Clark Electrical Services for any industrial or commercial electrical work.

Feel free to contact me with any questions.

Bradley T. Simonson

Director and General Manager
