

Recommendation for Kevin Clark Electrical Services, LLC

I am pleased to recommend Kevin Clark Electrical Services for any and all industrial troubleshooting/analysis/repair and installation.

During the past 10 years Kevin Clark Electrical has always responded to our industrial manufacturing needs; such as emergency repair of down production line equipment, trouble shooting of electrical system failures, and most recently running all the necessary wiring and hookups needed for our new robotic palletization installation.

They were also involved with the installation of our new automatic batching control system which was installed several years back.

There have been times when we absolutely needed a quick response to trouble shoot a problem which had our production line down and they were always quick to send someone out on an emergency call ASAP.

Our plant has dealt primarily with Mike Fiorillo over the years and we have found him to be a highly knowledgeable professional.

Overall they are all true professionals and experts in what they do and perform work to a very high quality standard.

I have always been pleased with the results of their work.

It is my pleasure to recommend them for any electrical services work or install you may require.

John Gonzales
